

ShareFinder

I have been interested in technical analysis since the early 1980s (before Windows!) and have had a number of TA different programs. I have done courses on TA and read any number of books on the subject. Despite this I have never managed to get a consistently successful trading method working. Fortunately I never quite lost faith.

You persuaded me to try the Spa Trademaster software. I have to say I am absolutely delighted with it! The reasons are simple.

- 1 The Spa scan puts you into such good shares, seemingly those performing best on the market at any given time.
- 2 The software takes all the stress and agonising out of share trading. Just do as the program says, nothing more and nothing less.
- 3 I just love that the method has as a basic tenet the protection of capital and gains.
- 4 I have never managed to match the all share index and now my portfolio is outperforming it.

In conclusion let me say that I have no hesitation in recommending Market Master and Spa Trademaster to anyone looking for a method to successfully trade the share market.

Best regards
Tony MacRitchie
